

Fluid & Drug Management in Neonatology How to make it Perfect?

International Webinar

Thursday, March 25, 2021
17:00 CET Time

Dear Invitee,

We all recognize that a child is not a small adult, a neonate is not a small child and a preterm baby is not a term infant.

This is the reason that the ones taking care of these small infants should have a better understanding of the pharmacokinetics and pharmacodynamics of medications in term and preterm infants.

We are fortunate to have in this webinar some of the world experts in this field that will help us to obtain a better understanding of these mechanisms and hereby give a better treatment to this vulnerable population.

{ SPEAKERS }

Prof. Willem de Boode
Radboudumc Amalia
Children's Hospital
Nijmegen, The Netherlands

Prof. Karel Allegaert
University of Leuven,
Belgium & Erasmus MC,
Rotterdam, The Netherlands

Prof. Sinno Simons
Erasmus MC, Rotterdam,
The Netherlands

Dr. Bernard Barzilay
Shamir Medical Center &
Tel Aviv University, Israel

{ AGENDA }

17:00-17:10
Introduction
Dr. Bernard Barzilay

17:10-17:40
Acid-base balance; an alternative approach
Prof. Willem deBoode

17:40-18:15
How to use drugs optimally in preterm infants
Prof. Sinno Simons

18:15-18:50
Pharmacokinetics and-dynamics of antibiotics:
is there any relevance to neonatal care?
Prof. Karel Allegaert

18:50-19:10
Q&A
Faculty

19:10-19:15
Adjourn
Dr. Bernard Barzilay

(All times are CET time)
